

Twisted

NITRO STUNT RACING

Loops and leaps are front and center in this high-flying racing game. High powered F-Jet racers provide a totally realistic racing experience with fine-tuned handling, air controls and over boosted engines. Single players can enjoy the heart-pounding action or heighten the competition by linking up to 4 game cabinets. Standard racing rules apply...but that is the only thing standard in this *Twisted* game!

GAME FEATURES INCLUDE:

- Players can drive 4 different F-Jet all terrain racing beasts
- Aerial handling & collision
- 5 race tracks, each with their own characteristics
- Tackle enormous jumps, huge loops, ramps & pipes
- Multiple surfaces types - asphalt, mud, sand, grass & metal

TRACK CATEGORIES:

AEROBATICS

The Aerobatic category is characterized by its twisted and menacing metal elements, which climb high into the air. Controlling speed is essential here to avoid the fatal fall.

JUMP

The Jump category brings one more element to control: the air. The F-Jet's mobile wings and jet engines enable speed and trajectory control during jumps.

SUPERCROSS

The Supercross category offers a surface made up mainly of dirt. Controlling drift is fundamental for negotiating the slopes and the bumps well.

TRACK: LOOPINGS

TRACK: JUMP IT UP

TRACK: HOT RUSK

Twisted
